

To all Racers and Trail Class Participants in the 2019 Iron Dog Race

This letter is to help all of you to be prepared and aware of what is expected from you at Tech Inspection.

The attached tech inspection form is what the tech inspection team will be using to tech you, your gear and your snowmobile.

It is highly recommended you review this form, and be familiar with it, and most important, know and understand the Iron Dog Race Rules that this form is based on.

The following items are worthwhile to take special note of;

- OEM Serial # on Engine and Chassis. On some snow machines, these # are behind mufflers, or covered by accessories. Make sure to write your serial # down before tech, otherwise you will be required to uncover these serial #.
- Make sure your snow machines are registered before tech inspection. You will not pass tech until this is done.
- Know where the Snell / ECE rating sticker is located on your helmet.
- Pack your sleeping bag so that the temperature rating sticker is visible just by opening the stuff bag.
- All items on the tech inspection list are required per each person, or individual snowmobile, unless noted otherwise

Should you have any questions prior to Tech, do not hesitate to contact any of the following;

David J. Bathke
